DESCRIPTION:

The DT/DR-2V2F/2F series is a reliable, cost effective, state-of-the-art, one fiber, Bi-directional Digital Video and Data transmission system. This fiber optic system transmits four channels of real-time 8 bit video with two full duplex channels of RS 422, Manchester or Bi-phase data over one Singlemode or Multimode fiber. The DT/DR-2V2F/2F accepts PAL, SECAM, or NTSC formats. The functionality of DT/DR-2V2F/2F series are further enhanced by their compatibility with Meridian's PC based SpectraSmart, Network Management and Remote Diagnostic Software System. SpectraSmart supervises the operating parameters of the transmission system such as status on video levels, sync, carrier detect, voltage, temperature, optical levels, data activity etc. See the SpectraSmart brochure for more details.

Note: 10 bit version available. See DV-2W 2F / 2F series.

CONFIGURATIONS:

The DV-2V 2F / 2F product family is available as rack mount cards and modules that can be installed in all of Meridian's card chassis, desk chaises and 19" racking frames. This system can be configured in either star (module to rack) or trunking (rack to rack) configurations. These systems can be made a standalone system by using the SR-1000/s, 2 slot desk / wall mount chassis (87VAC-264VAC)
