DESCRIPTION:

The DX-DFK series product incorporates a new digital encoding technology. This fiber optic system has One Channel each of Bi-directional RS 232, RS-422 & RS-485 (4wire) data signals over one Singlemode or Multimode fiber. Meridian's digital product line incorporates plug-in personality circuit cards to easily configure a wide variety of data channels on this system. The functionality of the DX-DFK series are further enhanced by their compatibility with Meridian's PC based *SpectraSmart* Network Management & Diagnostic Software system. *SpectraSmart* supervises the operating parameters of the transmission system such as the status on Digital carrier detect, voltages, temperatures, optical levels etc. See *SpectraSmart* brochure for further details.

CONFIGURATIONS:

The DX-DFK product family is available as rack mount cards suitable for mounting in Meridian card chassis and utilizes 2 card slots. These products can easily be converted to a Standalone module with the SR-1000/S, Desk / Wall mount 2-slot chassis (87- 264 VAC). See SR-1000 brochure for further details.
