DESCRIPTION

The FT/FR-1U2A2C2G/1M2A2C2G-SFP fiber optic transmission system takes advantage of Meridian's new digital encoding technology and transmits following signals on permanent bases:

1. One real-time, high quality, 10-bit 10 MHz video
2. Two full duplex 24 bit audio
3. One user selectable, full duplex RS-232, RS-485 (2 or 4 wire), RS-422, Manchester, Bi-Phase or in combination

In addition, following signals are optionable and interchangeable:

4. One integrated Pelco® Coaxitron or Panasonic® Up-the-coax PTZ camera control data
5. One user selectable, full duplex RS-232, RS-485 (2 or 4 wire), RS-422, Manchester, Bi-Phase or in combination
6. Two full duplex contact closure channels

Each camera's PTZ can be individually controlled. With Time Base Correction feature, these systems can achieve distances:

- up to 3Km for multimode
- up to 50Km for singlemode

Product is employing the industry standard Small Form Pluggable (SFP) optical device. This SFP gives you the option for either singlemode, multimode or CWDM wavelength selections by simply plugging in the appropriate SFP module.

The functionality of this system is further enhanced by its compatibility with Meridian's PC based SpectraSmart™, Network Management and Remote Diagnostic Software System. SpectraSmart™ supervises the operating parameters of the transmission system such as status on video levels, sync, carrier detect, voltage, temperature, optical levels, data present etc. See the SpectraSmart brochure for more details.

CONFIGURATIONS

The DigiCool™ family products are available as rack mount cards that can be installed in Meridian's card chassis, desk chassis and 19" racking frames. This system can be configured in either star (module to rack) or trunking (rack to rack) configurations. These systems can be made a standalone system by using the SR-500/s, 1 slot desk / wall mount chassis (87VAC-264VAC).
