### DESCRIPTION

Meridian's MC2FT1FX1SFP-M media converter is a cost-effective solution for the conversion between 10/100Base-TX and 100Base-FX interfaces, allowing you to extend communication distance by optical fiber. The MC2FT1FX1SFP-M supports MDI/MDIX auto detection, eliminating the need for crossover cables. The MC2FT1FX1SFP-M has a wide operating temperature range (-40 ~ 75°C) and accepts a wide voltage range from dual 12 ~ 48 VDC power inputs. These operating parameters make it suitable for operation under even the most extreme environments.

The MC2FT1FX1SFP-M also supports the LFP (Link Fault Pass-through) feature. Configured from the front-panel DIP switch, this LFP function will force the link to shutdown when it has detected a failure from the signal source. This feature enhances the overall reliability and fault detection capability of the network. The MC2FT1FX1SFP-M is a highly reliable media converter which can operate flawlessly in extreme environments.
