DESCRIPTION

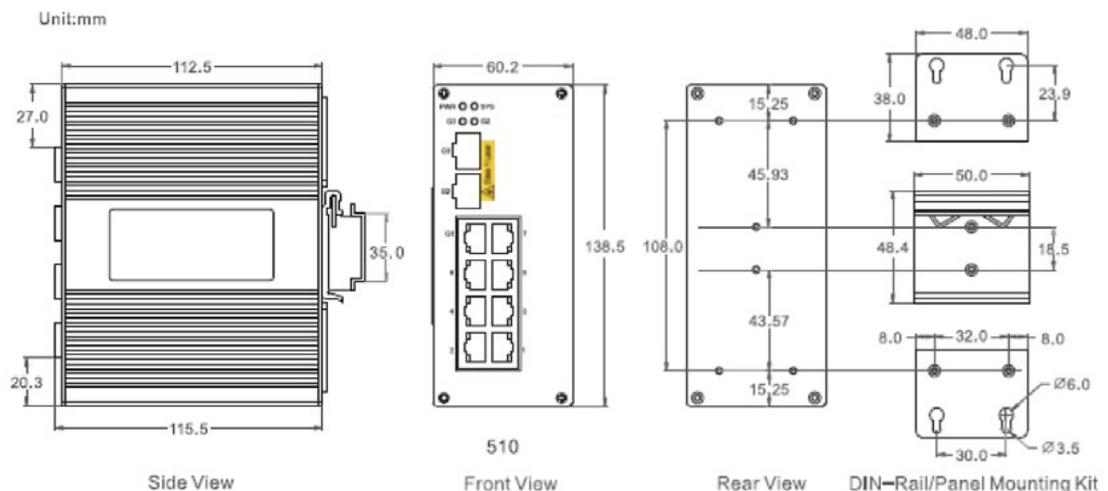

Meridian's MS10FT8GX2POEH is a managed redundant ring Ethernet switch with 8x10/100Base-T(X) ports with PoE+ function and 2x1000Base-X SFP ports. With complete support of Ethernet redundancy protocol, M-Ring (recovery time < 20ms over 250 units of connection), MSTP/RSTP/STP, these switches will protect your mission-critical applications from network interruptions with its fast recovery technology.

The MS10FT8GX2POEH also supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network.

Each MS10FT8GX2POEH switch has 8X10/100Base-T(X) 30Watts P.S.E. (Power Sourcing Equipment) ports. P.S.E. is a device that will provide power in a PoE setup.

MS10FT8GX2POEH supports the DDM (Digital Diagnostic Monitoring) function, which can monitor the status of Tx/Rx Optical Power and Temperature in real time.

In addition, with its wide operating temperature range from -40 to 85°C, this switch will operate even in the most severe environments. This switch is one of the most sought-after choices for highly-managed Fiber Ethernet applications with PoE functionality.
