DESCRIPTION

Meridian's US8GT8POEH-24V is an unmanaged, 8-port PoE Ethernet switch with P.S.E. function. The US8GT8POEH-24V supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network. Unit accept wide range 12~36VDC power inputs and generates 50VDC P.S.E. power output per port. The switch has eight 10/100/1000Base-TX P.S.E. (Power Sourcing Equipment) ports. Its rugged IP-30 housing design and wide operating temperature range (-40 to +75°C) enables it to operate in even the extreme environments. Therefore, the switch is one of the most reliable choices for PoE Ethernet applications.

As illustrated in the drawing, the US8GT8POEH-24V can be used to connect a number of PoE Ethernet devices (e.g., IP-Cameras, access panels, or other Ethernet devices requiring remote power. This switch also offers redundant power inputs for increased system reliability.

TYPICAL OPERATION

As illustrated in the drawing, the can be used to connect a number of PoE Ethernet devices (e.g., IP-Cameras or other Ethernet devices requiring remote power.
