

Meridian Technologies introduces its new
DigiSlim
single-slot digital product family
-- Video/Data/Audio Fiber Optic module --

Meridian Technologies has added to its growing line of high-performance digital fiber optic modules with the new ***DigiSlim*** product series. This new series of fiber optic modules uses the same superior designs as the dual-slot ***DigiFlex*** product family and can be configured to transmit/receive signals from a simple one-way video signal to a complex configuration including:

- 1 channel, 10-bit VIDEO***
- 2 bi-directional, 24-bit AUDIO channels***
- 2 bi-directional, multi-protocol DATA channels***
- 2 bi-directional CONTACT CLOSURES***
- (All in a compact, 1-slot module design)***

Any combination of these signals can be easily configured - providing a very comprehensive & flexible product offering. These new ***DigiSlim*** products can replace Meridian's present 160R, 170R, 180R, 200iR, 300iR, 400iR, 500iR & 700iR FM series products and provide superior, digital-quality performance.

Price competitive - The ***DigiSlim*** product series is competitively priced and is priced in line with the present FM products offered by Meridian.

More information - Attached is a data sheet for the comprehensive ***DigiSlim*** module as well as the part numbers and descriptions for the other ***DigiSlim*** products. For additional information on this new product series, contact Meridian directly at 516-285-1000, or call your local Meridian representative. You can also find out more about these and all of the other Meridian fiber optic products by visiting our website at www.meridian-tech.com
