

*****INTRODUCING *****
Pelco SPECTRA III Dome Camera
Board-Level Transmitter from
Meridian Technologies
(Now with SpectraView™)

Meridian Technologies has added to its growing line of high-performance digital fiber optic products with the new board-level fiber optic digital transmitter that is form, fit and function compatible with the Pelco SPECTRA III Dome camera. This product fits neatly inside the expansion slot in the Pelco camera and has a fiber optic pigtail for easy connection to the main fiber cable. Some of the features of this product include the following:

- All digital design***
- 1 channel, 10-bit VIDEO***
- 1 bi-directional RS-422 (Pelco compatible) data channel***
- Available in both Multimode and Singlemode versions***
- Compatible Receiver available in either card or stand-alone module***
- Meets RS-250C short haul specifications for exceptional performance***
- SpectraView™ on-monitor diagnostic aid built in***
- Optional Meridian SpectraSmart NMS compatibility***

This transmitter product integrates directly inside the camera's dome, provides broadcast level video and bi-directional Pelco compatible RS-422 data and is available in both multimode and singlemode versions. The compatible receiver can be either rack mounted or as a stand-alone module.

This system includes Meridian's new SpectraView 'on-monitor' diagnostic software to visually alert the operator in the event of loss of video sync or loss of fiber.

More information - Attached is a data sheet for Meridian's Pelco SPECTRA III dome camera compatible transmitter board and receiver card/module.

For additional information & pricing on this new product, contact Meridian directly at 516-285-1000 or your local Meridian representative. You can also find out more about these and all of the other Meridian fiber optic products by visiting our website at www.meridian-tech.com
